Quality

dwr

Structural Concrete Reinforcing sets the highest standards for its steel products and services. We are a vertically integrated company, providing the highest level of quality control over the total production process. Our turnkey manufacturing procedure begins with producing our own steel, and finalizes with jobsite delivery of fabricated mats.

Our products fully comply with the following construction standards, codes and specifications:

ASTM

IBC / ACI

AASHTO

Optimal crack control

1. Welded intersections minimize random cracks and effectively control separation.
2. Positive (raised) deformation, assures superior concrete bond strength.
3. Total square footage of material acts as an integrated unit.

dwr employs professional personnel to develop and supervise complete projects throughout the following steps:

- # *Take-offs*
- # *Submittal Documentation*
- # *Shop Drawings*
- # *Fabrication*
- # *Jobsite Delivery*
- # *Jobsite Assistance*

why choose **dwr** structural concrete reinforcing?

Superior Quality Concrete Structures

Cost efficient

Field efficient

High tensile strength
