

DWR PRODUCTS

SAFETY PRECAUTIONS & INSTALLATION GUIDELINES

Read and follow the safety precautions and installation guidelines in this manual when installing and using a DWR product manufactured by Deacero.

These guidelines might apply for DWR deformed wire reinforcement mat designs.

BEFORE STARTING A JOB

- 1 Always wear protective gloves, boots and clothing to prevent serious cuts and punctures when handling fence components and tools.
- 2 Protective eye wear is a must. Sharp edges and ends on nails, fencing wire, staples and other components can cause serious eye injury.
- 3 Always read and follow the instruction manuals supplied by the manufacturers of the tools and equipment you use.
- 4 Inspect all tools and equipment before use to be sure that they are functioning properly and are safe to use.
- 5 Any tools or equipment that appears to be damaged, worn, or not functioning correctly should be taken out of service immediately and should not be used.
- 6 Know and respect local building codes where applicable.
- 7 Contact all utility companies to mark any underground lines or pipes.

WHEN HANDLING THE PRODUCT

- 1 Work with a partner to make the job easier and safer.
- 2 Take your time and be cautious.
- 3 Save these instructions for future reference.
